

Andrew M. Dumitru

UX / PRODUCT DESIGNER

Chicago, Illinois | AndrewDumitru@outlook.com | 773-319-4110

[Portfolio](#) | [LinkedIn](#)

UX / Product Designer who researches, designs, and ships accessible web and mobile products from concept through implementation. Creator of Backwater Journal, a mobile product designed and developed from UX strategy through production. Brings six years of U.S. Air Force experience in precision, quality assurance, documentation, and technical execution.

EXPERIENCE

Backwater Journal | Product Designer & Mobile App Developer | Dec 2025 - Present

- Designed, developed, and released Backwater Journal, a mobile fishing app that brings catch logging, journaling, species tracking, messaging, and community features into one product.
- Owned product flows and reusable interface patterns across journal, profile, and messaging experiences, translating Figma concepts into consistent mobile interactions.
- Implemented product decisions with React Native, Expo, Supabase, and SQL, connecting UX/UI design directly to functional mobile experiences.

UX Designer & Researcher | DePaul University iD Lab | Jan 2024 - Present

- Design wireframes, interactive prototypes, and interface concepts in Figma for web-based UX projects from discovery through refinement.
- Apply user-centered design methods to improve information architecture, navigation, visual hierarchy, and accessibility.
- Translate stakeholder and project collaborator feedback into iterative design updates and documented recommendations.
- Collaborate with designers and developers to refine layouts and interactions within technical constraints.

Aircraft Maintenance Specialist | United States Air Force | Oct 2018 - Oct 2024

- Performed precision structural repairs and preventive maintenance in safety-critical aircraft environments.
- Coordinated with cross-functional maintenance teams to diagnose issues, execute repairs, and meet operational deadlines within strict technical requirements.
- Inspected completed structural repairs for accuracy, compliance, and quality before aircraft return to service.
- Trained and supported junior personnel on repair procedures, technical documentation, and quality-control standards.
- Reduced maintenance time by 20% through improved quality-control practices and more consistent repair workflows.

CORE SKILLS

UX & Product Design: User Research, Usability Testing, UX Design, UI Design, Interaction Design, Wireframing, Prototyping, User Flows, Information Architecture, Accessibility

Tools & Technology: Figma, Adobe Creative Suite, Miro, HTML, CSS, JavaScript, TypeScript, React Native, Expo, Supabase, SQL, Git/GitHub

Languages: English (Native), Romanian (Fluent)

EDUCATION

Bachelor of Science in User Experience Research and Design | DePaul University | 2024 - Present

CERTIFICATIONS

Google UX Design Specialization | 2024

Google Cloud Database Engineer Specialization | 2024
