

Andrew M. Dumitru

UX / PRODUCT DESIGNER

Chicago, Illinois | AndrewDumitru@outlook.com | 773-319-4110

[Portfolio](#) | [LinkedIn](#)

UX / Product Designer who researches, designs, and ships accessible web and mobile products from concept through implementation. Experienced in user research, interaction design, prototyping, accessibility, and translating product decisions into functional interfaces. Brings six years of U.S. Air Force experience in precision, quality assurance, documentation, and technical execution.

EXPERIENCE

Product Designer & Mobile App Developer | Backwater Journal | Dec 2025 - Present

- Shipped 1 production mobile app spanning 5+ core product experiences, including catch logging, journaling, species tracking, messaging, and community features, owning design and development from concept through release.
- Designed and standardized 4 major end-to-end flows across journal, profile, marketplace, and messaging, using Figma to build reusable interaction patterns and improve consistency across the product.
- Refined 5+ interface areas, including navigation, messaging context, saved items, image presentation, and spacing, by translating beta feedback and product testing into iterative UX improvements.
- Implemented production UX with React Native, Expo, Supabase, and SQL, bridging product design and development to move concepts into functional mobile experiences.

UX Designer & Researcher, Selected Projects | DePaul University iD Lab | Jan 2024 - Present

- Drive web-based UX projects through discovery, user-flow design, prototyping, and refinement, producing responsive Figma concepts that translate requirements into testable interfaces.
- Evaluate usability across information architecture, navigation, visual hierarchy, and accessibility, identifying friction points and translating findings into clearer interface decisions.
- Convert stakeholder and collaborator feedback into iterative design changes, documented recommendations, and clearer user flows, aligning project requirements with user needs throughout refinement.
- Partner with designers and developers to refine responsive layouts, interaction behavior, and implementation details, strengthening design-to-development handoff within technical constraints.

Aircraft Maintenance Specialist | United States Air Force | Oct 2018 - Oct 2024

- Performed precision structural repairs and preventive maintenance in safety-critical aircraft environments.
 - Coordinated with cross-functional maintenance teams to diagnose issues, execute repairs, and meet operational deadlines within strict technical requirements.
 - Inspected completed structural repairs for accuracy, compliance, and quality before aircraft return to service.
 - Trained and supported junior personnel on repair procedures, technical documentation, and quality-control standards.
 - Reduced maintenance time by 20% by improving quality-control practices and standardizing repair workflows, increasing operational efficiency without compromising safety or compliance.
-

CORE SKILLS

UX & Product Design: User Research, Usability Testing, UX Design, UI Design, Interaction Design, Wireframing, Prototyping, User Flows, Information Architecture, Responsive Design, Accessibility (WCAG), Developer Handoff

Tools & Technology: Figma, Adobe Creative Suite, Miro, HTML, CSS, JavaScript, TypeScript, React Native, Expo, Supabase, SQL, Git/GitHub

Languages: English (Native), Romanian (Fluent)

EDUCATION

Bachelor of Science in User Experience Research and Design | DePaul University | 2024 - Present

Grayson High School | Diploma | 2014

CERTIFICATIONS

Google UX Design Specialization | 2024 | Google Cloud Database Engineer Specialization | 2024
